

# Tower Attachments

## Access utility grade towers with network services across Ontario

The wireless world continues to change and grow and the need for tower space is growing with it. Building new infrastructure is costly and requires community approvals, but Acronym's Tower Attachment Services provide you with timely and cost-effective access to a network of utility grade towers across Ontario. Tower attachments are ideal for carriers, service providers and public sector organizations.

## A system designed for stability and reliability

With Acronym, you benefit from a system designed for stability and reliability that's built to provide maximum resiliency. Originally constructed to protect and control Ontario's electricity grid, our fibre-optic network runs above ground on Hydro One's transmission towers and is monitored by Acronym's geographically diverse Network Operations Centres.

## Expand your footprint

Acronym's Tower Attachment Services offer a rapid and cost-effective solution for your organization's expanding network connectivity needs. Take advantage of attachment options on towers located across Ontario.

## Optional backhaul, monitoring and co-location services

Along with antenna attachments, Acronym offers backhaul and connectivity to meet your unique network requirements. We'll work with you to construct the right solution for your equipment on-site, co-located in one of our shelters or in your shelter placed on our premises. Monitoring options for door alarms and batteries are also available.

## Ontario-wide fibre network with connectivity to points beyond

Acronym has an extensive fibre-optic network spanning more than 8,700 km, which makes it possible for organizations to diversely link facilities and offices. And, because our network is interconnected with many North American carriers, we can provide network solutions that go far beyond Ontario's borders.

## Service features

Interface/Feature	Capacity/Details
Antenna attachments	Available on Hydro One's network of self-supporting steel towers
Backhaul options	Fibre-based data connectivity available at many sites
Co-location	Space and power available
Shelter placement	Place your own shelter on our premises
Monitoring	Remote battery and door alarming available, monitored by Acronym's Network Operations Centres
Detailed list of towers and locations	Available upon request
