

SECURE IT SWITCH

SECURITY

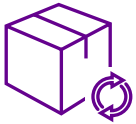

Powerful Switches With Advanced Security for Connected Networks

PRODUCT OVERVIEW

Secure IT - Switch is a comprehensive switch solution with industry leading cloud management to easily build networks. The included hardware switches are powered by Cisco Meraki and are designed to provide high efficiency for any environment. The solution

provides advanced security through 24/7/365 monitoring and management by our network operations staff and integration with our security information and event management (SIEM) system.

LEADING EDGE TECHNOLOGY

Powered by Cisco Meraki, the cloud managed solution includes a robust feature set right out of the box.

FIXED MONTHLY COST

This turnkey solution includes licensing, hardware, software, configuration, management, 24/7/365 technical support and security for a flat monthly cost per switch.

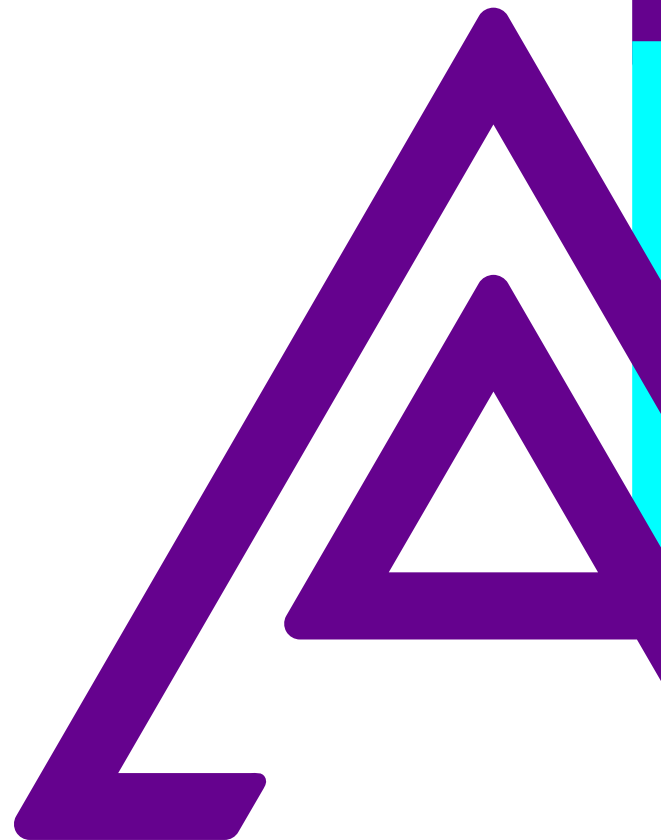

PERSISTENT SECURITY

Includes real time security analytics, industry leading security information and event management (SIEM) and a 24/7/365 network operations staff.

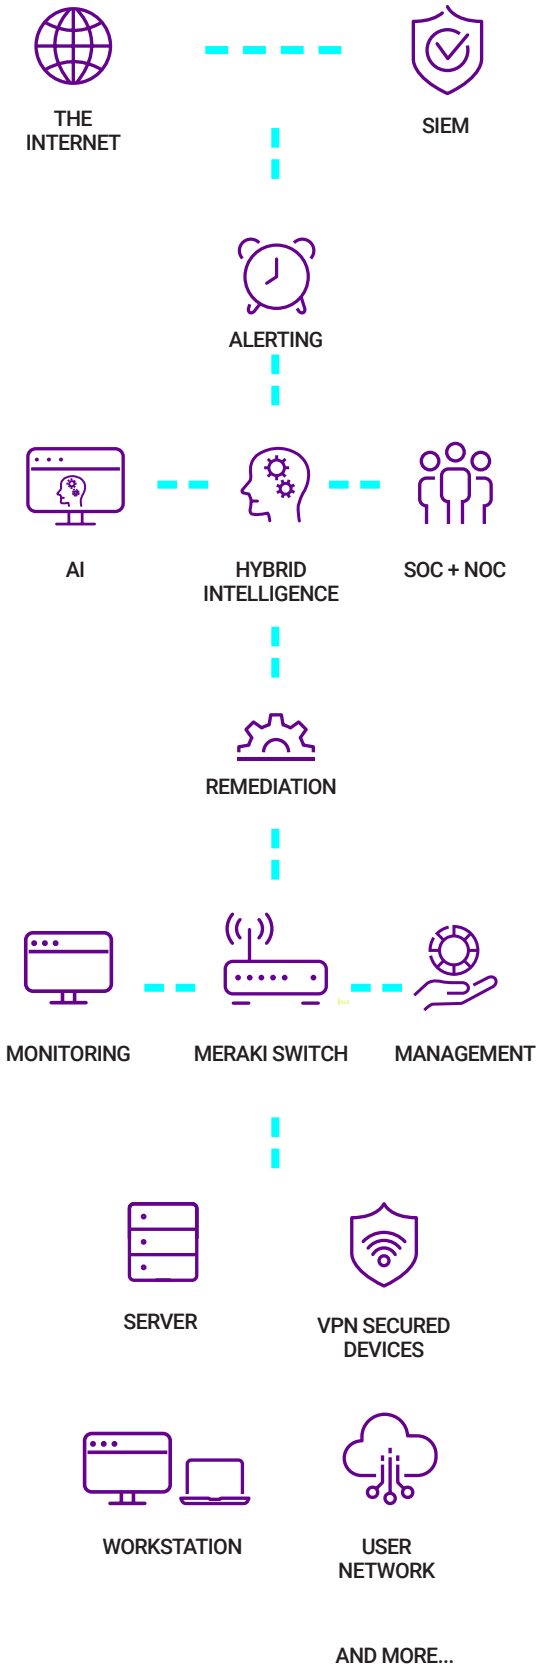

WARRANTY AND SUPPORT

All switches come with different warranty and enterprise support options to ensure your network stays connected.

HOW IT WORKS

INTEGRATION

Secure IT - Switch is designed to integrate seamlessly into any IT environment. The installed Cisco Meraki switches are configured to run through the SIEM service. The SIEM service is bundled with our 24/7 operations centre for essential protection and monitoring

 CHOOSE THE RIGHT COMBINATION OF SWITCHES FOR YOUR ENVIRONMENT

 LEARNING AND CUSTOMIZATION

 GO LIVE WITH SIEM PROTECTION

INCLUDED FEATURES

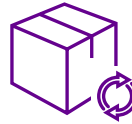

FULL MANAGEMENT

Leverage a team of subject matter experts using industry best practices to manage the switches from end-to-end including management of all switches, backup of switch configuration to a secure cloud, monitor switch logs and alert notifications, troubleshooting and remediation activities and monthly consolidated reports.

ADVANCED SECURITY ANALYTICS AND EVENT MANAGEMENT

The switch solution is integrated with our SIEM system. Our SIEM uses sophisticated machine learning to determine if a threat is taking place by analyzing security events within your environment. Suspicious activity is reported in real time to live security agents for further analysis and action, including termination of the connection or threat to protect the customer's infrastructure.

INDUSTRY LEADING TECHNOLOGY

Built using the Cisco Meraki platform, this service includes all the benefits of leading-edge hardware right out of the box. This includes Centralized Management, Network Troubleshooting & Automation and Application Layer Visibility.
