ACRONYM

SECURE IT
FIREWALL

Monitor, Maintain and Mitigate Against Live Security Threats With IT Experts

PRODUCT OVERVIEW

Secure IT - Firewall is an award-winning Network Perimeter Security Monitoring and Management service that includes next-generation firewall(s) designed to protect your network's infrastructure. Added benefits to our firewall solution include: improved site-to-site connectivity, application-specific rules, and central administration of network/security operations for your business. The service includes the deployment of next-generation firewall(s) to your premises. These devices are configured to meet the network access and security requirements of your organization and provide near real-time alerting on threats. These threats are filtered through our Security Operations Centre (SOC) for live agent analysis and remediation.

SIEM INTEGRATION & REMEDIATION
Security Information and Event Management analyzes log data to identify potential threats for remediation by our security team.

INSIGHTFUL MONTHLY REPORTS
Security insights into user and system usage is automatically sent.

24/7/365 MONITORING & MANAGEMENT
Our security teams monitor all security and performance alerts from the firewall and perform remediation activities when necessary.
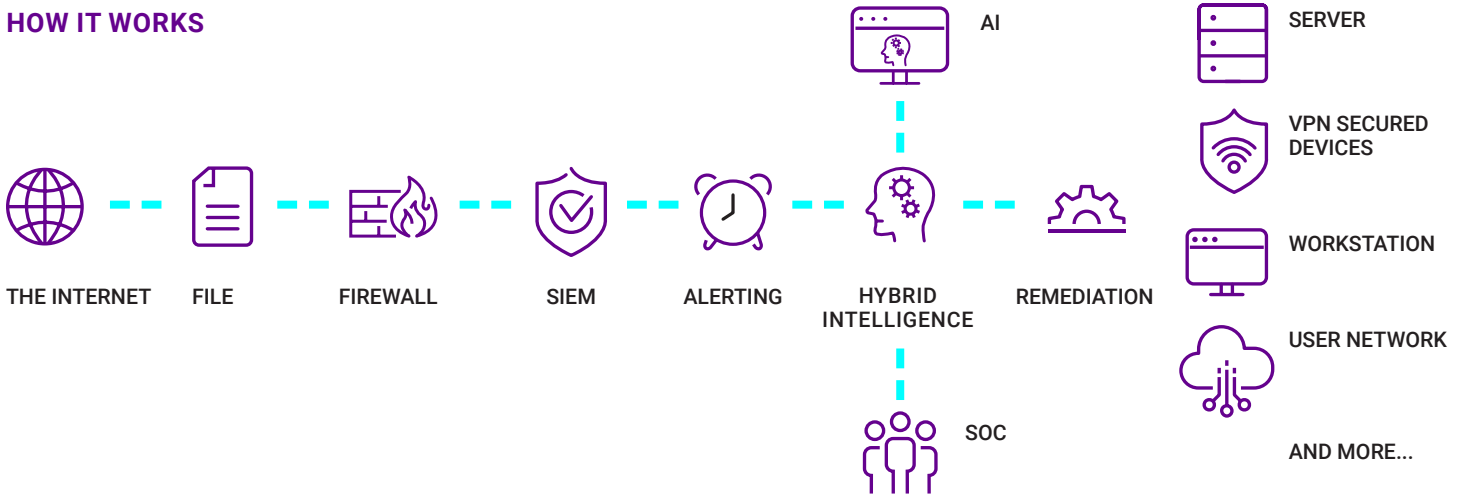

FLEXIBLE HARDWARE INTEGRATION
The service can either include Barracuda or Fortinet Firewalls or be bundled with existing Firewalls from Barracuda, Fortinet or Cisco Meraki.

INTEGRATION

Secure IT - Firewall is designed to integrate seamlessly into Barracuda, Cisco Meraki or Fortinet firewalls. Upon integration with your firewall, the service provides instant security through our SIEM and live security agents. The SIEM service is attached to the firewall remotely through our Security Operations Centre.

ASSESSMENT OF THE NUMBER OF USERS AND ENDPOINTS WITHIN THE NETWORK > **FIREWALL MODEL RECOMMENDATION** > **SECURITY SERVICE-PLATFORM MIGRATION** > **IMPLEMENTATION OF INDUSTRY BEST PRACTICES** > **END-USER SECURITY REVIEW AND ANALYSIS**

WHAT IS A NEXT-GENERATION FIREWALL?

A Next-Generation Firewall has the same benefits as a traditional firewall that presents enhanced capabilities that allow real-time protection against malware, vulnerabilities and network attacks. Intelligent analysis allows for deep application context, which allows administrators to determine how applications within the network are being used. Secure IT - Firewall service also contains years of Hybrid Intelligence that combines both human and machine learning to apply rules to specific applications and other functions to allow or deny traffic.

INTRUSION DETECTION AND PREVENTION

SSL INSPECTION

APPLICATION CONTROL

ANTI-SPAM

WEB FILTERING

ANTI-VIRUS GATEWAY

SSL AND IPSEC VPNS

AVAILABLE ADD-ONS

OT SPECIFIC INSPECTION
Provides the OT network with the level of security that it needs without sacrificing network performance.

IOT DETECTION SERVICE
Allows to automatically detect and segment IoT devices and enforce appropriate policies.
