

We'll support your IT operations 24/7/365 in multiple languages

Support IT provides 24/7/365 technical support to ensure your operations run smoothly. We'll take care of everything from specific technical issues with an app to system-wide outages. Support IT can complement your in-house IT team or manage the service desk operations in your organization. We operate in multiple languages, making Support IT an effective solution for businesses with global branches.

WHY IT MATTERS

Every organization needs day-to-day technical support, but building an in-house IT team can be expensive. We can streamline your tech support to lower costs and increase efficiency. By offloading your IT support, you can free up internal resources so you can focus on what you do best.

HOW IT WORKS

Our managed help desk service integrates seamlessly into any business environment. We provide complete IT support – from a help desk to handle individual issues, to our service desk that prioritizes technical issues through a ticket management system.

Our Support IT help desk is SOC 2 Type I compliant – meaning that the controls, procedures and personnel involved in our service desk adhere to industry best practices.

HELP DESK TEAM

WHAT TO EXPECT

Tier 1: Front-line support. Handles service tickets, prioritizes tech issues, assigns appropriate resources and dispatches onsite technicians as needed.

Tier 2: Escalation team. Serves as an escalation point for all customer concerns, technical reviews and planning issues.

Tier 3: Escalation with senior team. Investigates and solves more complex service issues. Additionally, Tier 3 will be assigned to your organization if there is a potential change to your IT environment.

Web portal. Our web dashboard is a transparent log of our work. It assists in problem resolution times by keeping our team focused on their responsibilities and resolution target times.

Contact. Call, email, or online chat are the key contact methods for our help desk team.
