ACRONYM

SECURE IT
WIFI

Managed Turnkey WiFi Solution that provides wireless network with Advanced Security

PRODUCT OVERVIEW

Secure IT - WiFi provides one of the most comprehensive turnkey solutions for the delivery of WiFi services. This includes wireless access points, licensing, configuration, management and advanced security information and event analysis, including threat detection and remediation. Secure IT - WiFi is simple to deploy and easy to manage. It comes with no up-front purchase fees and gives customers a secure wireless solution with 24/7 security event management for one flat monthly fee.

LEADING EDGE TECHNOLOGY

Powered by Cisco Meraki, the cloud managed solution includes a robust feature set right out of the box.

PERSISTENT SECURITY

Includes real time security analytics, industry leading security information and event management (SIEM) and a 24/7/365 network operations staff.

CONFIGURATION & MANAGEMENT

Low cost installation services and expert configuration, with management and technical support available 24/7/365.
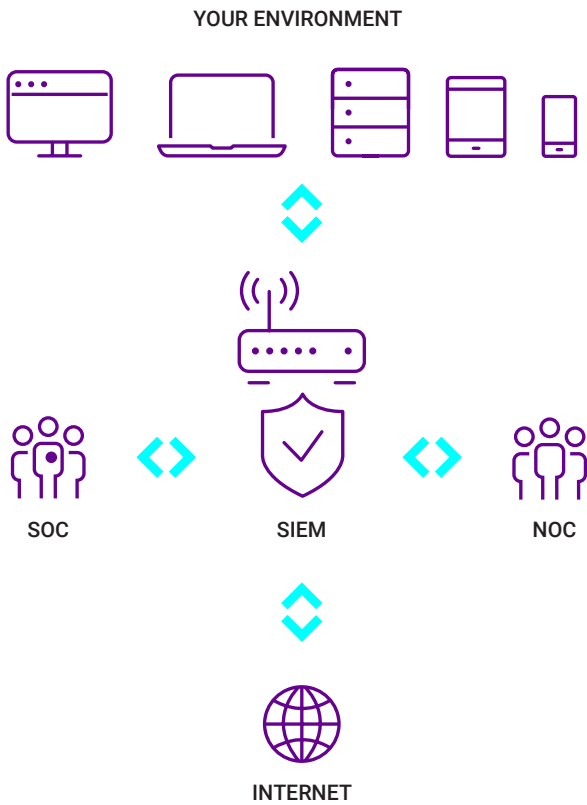

FIXED MONTHLY COSTS

This turnkey solution includes hardware, software, configuration, management and security for a flat monthly cost per access point.

HOW IT WORKS

YOUR ENVIRONMENT

SOC ⟷ SIEM ⟷ NOC

INTERNET

INTEGRATION

Secure IT - WiFi is designed to integrate seamlessly into any IT environment. The installed Cisco Meraki access points and switches are configured to run through the SIEM service. The SIEM service is bundled with our 24/7 operations centre for essential protection and monitoring.

CHOOSE THE RIGHT COMBINATION OF ACCESS POINTS FOR YOUR ENVIRONMENT

LEARNING AND CUSTOMIZATION

GO LIVE WITH SIEM PROTECTION

OUR TEAM AND PLATFORM

SECURITY INFORMATION & EVENT MANAGEMENT

All our wireless access points are SIEM integrated. Our SIEM system uses sophisticated machine learning to determine if a threat is taking place by analyzing security events within your environment for remediation.

SECURITY OPERATIONS CENTRE

A team comprised of security experts that fight advanced threats in near real time.

NETWORK OPERATIONS CENTRE

A team comprised of live agents who monitor all device and performance alerts within our customer's infrastructure.

INCLUDED FEATURES

FULL MANAGEMENT

Leverage a team of subject matter experts using industry best practices to manage the WiFi solution from end-to-end including: management of all access points, backup of access point configuration to a secure cloud, monitor access point logs and alert notifications, troubleshooting and remediation activities and monthly consolidated reports on WiFi service.

ADVANCED SECURITY ANALYTICS AND EVENT MANAGEMENT

The WiFi solution is integrated with our SIEM system. Our SIEM uses sophisticated machine learning to determine if a threat is taking place by analyzing security events within your environment. Suspicious activity is reported in real time to live security agents for further analysis and action, including termination of the connection or threat to protect the customer's infrastructure.

LEADING EDGE TECHNOLOGY

Built using the Cisco Meraki platform, this service includes all the benefits of leading-edge hardware right out of the box. This includes Centralized Management, Automatic RF optimization, High Capacity 802.11ac radios and Application Visibility/Control.

ADD ONS

REQUIRED CABLING

Standard structured cabling can be installed from the customer's switching environment to the desired locations of the access points.

WIRELESS SURVEY

Using specialized purpose-built technology, an onsite technician will conduct a survey to assess wireless coverage and provide a report with recommendations on the quantity, size and placement of access points for optimal coverage.

RADIUS INTEGRATION

To support integration with active directory environments, this option includes new RADIUS server installation, as well as reconfiguring or adding RADIUS service on existing servers.

SECURE IT POE SWITCH/INJECTOR

Easily add Power over Ethernet (POE) switches and injectors into the monthly priced solution as needed to support the growth of your wireless network.
