

INTERNET AND NETWORKS

Connecting networks, securing data and providing solutions for your business.

For over two decades, we've worked to ensure businesses and organizations have the means to connect. Regardless of what your network goals are – improve performance, build resilience or increase capacity – we can help.

Expanding your network and capacity, without expanding your risk.

When it comes to connectivity, every organization has different priorities from the next. For some, performance and security are most important, while others are looking for flexibility and support or require a strong, consistent connection across multiple locations.

Whatever your objectives are, we can address your needs in the following ways:

HIGH PERFORMANCE

Transfer large amounts of data quickly and securely through a low-latency, high-bandwidth network connection. Our DIA, MPLS, Ethernet and Wavelength services provide dependable, high-performance bandwidth for the most demanding workloads.

BUSINESS RESILIENCE

Pivot quickly when priorities and circumstances change while continuing to support your staff and operations, with a multi-layer, fault-tolerant network architecture, powered by fully redundant POPs, diverse path routing and innovative solutions that provide business agility.

SECURITY AND CONTROL

Connect freely while keeping all data secure through our carrier grade encryption certified deployments. SOC2 Type II compliance and integrated physical and logical security represent our commitment towards high data security standards.

FLEXIBILITY AND SCALABILITY

Select from a large range of bandwidth options, geographic route selections and physical interfaces to develop customized connectivity solutions, develop and scale customized solutions on demand, whenever required.

SUPPORT

Engage 24/7/365 support and service from our world-class Client Engagement Centre, and benefit from our SLAs with service guarantees.

BUILD YOUR OWN NETWORK

Create your own network with Acronym's unlit dark fibre services, providing customized security and maximum control.

400 GBPS NETWORK

Our carrier grade network supports optical wavelength services up to 400 Gbps.

ENTERPRISE READY BUSINESS SOLUTIONS

Offering an array of security, voice, cloud and managed IT services to help your businesses support and manage their IT investments and network operations.

It's your business. Select the dependable, high-performing network that's right for it.

Our extensive fibre-optic network spans more than 9,800 km, making it possible for organizations like yours to connect facilities and offices.

DIA with DDoS Shield	Exclusive, non-shared internet connection across multiple upstream interconnects. Plus, DDoS Shield can be added to quickly and seamlessly protect against DDoS attacks.
Secure SD-WAN	Faster connectivity and better branch-to-cloud network performance with built-in cyber security protection.
MPLS	Business-grade network availability and infrastructure redundancy for the most demanding workloads.
Ethernet	Scalable and flexible network services up to 100 Gbps.
Wavelength	High-performance transport network up to 400 Gbps via protected or unprotected circuits across North America.
Dark Fibre	Unlit transport network services across North America.
Tower Attachment	Utility-grade and colocation options across Ontario to expand coverage and meet the needs of carriers, service providers and public-sector organizations.
